DRAFT MAY 2008

School Improvement Planning

HS Themes for 2008-2009

Based on data from a variety of sources (school statistics, students, staff) I am working with the staff to build the focus and direction for school improvement. This is a work in progress, but below is a draft of where we are so far.

Faculty Committees are working on the following issues and preparing recommendations that will be considered prior to the end of the school year.

- Use technology to improve communication internally and externally.
- Create a system to establish and monitor standards for consistent delivery of curriculum for all courses.
- Engage all students in the learning process.
- Enforce school rules and policies school wide and in individual classrooms in a consistent and timely manner.
- Use our school day and master schedule to create time for all staff to collaborate on school and team SMART goals.
- Create a system to recognize student achievements in the Academic, Extracurricular and Community realms.
